

Living Smart ... Living Green

Smart Lighting. Lighting accounts for 20% of all electricity consumed. But 50% of that consumption is waste. With social smart home, you can automate your lights so they come on when you need them and go off when you don't.

Advanced Temperature Control. With simple, convenient temperature control, save energy for the environment, but save energy costs as well. A keypad near the door automatically signals that you are leaving the house and adjusts the temperature accordingly.

Effortless Entertainment. Save clutter from remote controls, jewel cases, and DVDs. With one convenient control, command your entertainment world (including your entire digital music and movie collection) from anywhere in your home.

Peace of mind. With the push of a button, you can arm your alarm, turn off lights, reset the thermostat, and shut down all your electronic devices. Even be notified in the event of an emergency. And with remote access, you can monitor your house even when you're not in it.

your lifestyle

smart living
design group

what makes a smart living design group home so smart?

Your home is your castle. It should do exactly what you want it to. We can develop solutions so that all the electronics in your house (your entertainment system, lights, thermostat, security, phone, network) bend to your will. We'll make them all simpler to use, more efficient, and perfectly customized to your lifestyle. Our expert designers and installers will work with you, your architect, and your designer to create the smart home just for you.

electronic solutions customized to your lifestyle

Home Theaters and Media Rooms

See and hear precisely what was intended by the artists you enjoy. Our THX Certified designers have the expertise, creativity, and craftsmanship to even exceed the theater-going experience.

Home Control

Home control devices put an end to remote overload. With one reliable and user-friendly device, anyone in your family can operate your entertainment system, digital music, lights, thermostat, shades, and more.

Telephone Systems

Our customized phone systems can meet a range of needs, from a simple one-line handset to a multi-line, multi-zone system. Or a hybrid solution using both.

Entry Systems

When someone rings the doorbell, pick up the phone to speak to the visitor, or press a button to open the gate. Add video capability, and you can see who's there.

with our home control devices, different options are available to help put an end to your remote overload

Security, Surveillance, and Monitoring

Monitor your home whether you're in the house or halfway around the globe. Say there's a water leak...you and your plumber can be notified via email or text message. Even shut the water off remotely.

Cable and Networking

A network is a home's central nervous system. We'll help lay a solid and reliable foundation that's ready for today's technology and tomorrow's.

Lighting Control

Light not only establishes a mood, it also makes your home safer and more convenient. Push a button and turn off every light when you leave. Never be greeted by a dark house when you get back.

Music in Every Room

Wire your home for sound in all common rooms, making party music easy, pleasant, and unobtrusive. Change the music to match your mood from any room in the house.
